A crypto currency is a digital currency, which is an alternative form of payment created using encryption algorithms. The use of encryption technologies means that crypto currencies function both as a currency and as a virtual accounting system.

Crypto currency is a digital currency that uses cryptography for security, operating on a decentralized, peer to peer network, and is not controlled by a central authority like a bank. It works through block chain technology, a public, distributed ledger that records transactions securely and transparently.

Crypto currency is a form of digital or virtual currency that exists only online, unlike traditional currencies like the Dollar or Euro, which have physical forms.

Crypto trading bots are automated software tools designed that automatically trade crypto currencies across multiple platforms and handle the buying & selling of crypto currencies based on predetermined parameters with the aim of generating profits. They work on behalf of an owner or user. These bots buy and sell crypto assets at the right time to generate profit. These bots typically analyze and process various market data such as price, volume, orders, and time frames. This information is utilized to fine-tune their operational parameters and align them with specific trading strategies and objectives.

Moreover, as you may already know, the crypto currency market is highly volatile. For you, it's not humanly possible to monitor the market 24/7 and make profitable decisions. It takes minutes for the whole market to crash or reach a stage of euphoria. Some investors cannot give enough time to the crypto market to take advantage of the price change.

Trading bots are prevalent not just in the crypto market, but also in traditional financial markets. They remove human emotions like fear and greed that can often get in the way of making unbiased trading decisions. But despite being designed to trade based on programmed settings, trading bots aren't a surefire way to make a profit and still require monitoring and tweaking for optimal performance. You can use them to engage in crypto investing around the world, round the clock. They can quickly react to the change in prices and conduct profitable trades. It analyses costs across different exchanges and makes trades by taking advantage of discrepancies.

WORKING STRATEGY OF AI BOT

Crypto currency trading bots make trades based on a range of market indicators and parameters that are pre-configured into their programming. These parameters can be simple or complex, depending on the sophistication of the bot and the trading strategy it's designed to implement.

These bots are automated software tools designed to handle buying and selling of crypto currencies based on predetermined parameters with the aim of generating profits. The most common parameters include market indicators, such as moving averages, relative strength index (RSI), Bollinger Bands, and Moving Average Convergence Divergence (MACD). Other parameters include trading volume, price, time frame, and order book data. Once these parameters are set, the trading bot monitors the market relentlessly.

Some popular strategies for crypto trading bots include trend trading, arbitrage, scalping, momentum trading, reversal trading, news trading, and dollar-cost averaging.

Crypto trading bots offer numerous advantages, such as the ability to trade 24/7, remove emotional bias from trading decisions, increase transaction speed, and analyze vast amounts of data simultaneously. But they also come with risks and limitations.

With a large selection of cryptocurrency trading tools for automatic trading on the biggest cryptocurrency exchanges, it is a reliable cloud-based platform.

CRYPTO PORTFOLIO TRACKER

It has tool for tracking crypto portfolios that is simple, secure, and exact. Linking various exchange APIs to monitor the balances automatically.

MULTIPLE ACCOUNT MANAGEMENT

It use several APIs in a single trade simultaneously. Traders may handle several cryptocurrency exchange accounts effortlessly, through the trading platform or automatically with bots.

Orders can have Take Profit, Stop Loss, Trailing Stops. It may run as many crypto currency trading accounts at once using automated trade execution.

7 DYNAMIC AI TRADING PACKAGES

STARTER Package : \$500

ELITE Package : \$1000

PRO Package : \$2500

ACE Package : \$5000

EXPERT Package : \$10000

TYCOON Package : \$25000

BUSINESS Package : \$50000

- © Anytime you can take refund of your trading package.
- © With a one month prior notice, you will receive 100% of the trading package.

100% Safe and Secure

Distribution Ratio

15% of the monthly trading income will be distributed as Trading Income.

Example 1

Calculation Formula

$$\begin{aligned} \$100 \times 25\% &= \$25 \\ 25 \times 15\% &= \$3.75 \end{aligned}$$

If the trading package is \$100 and trading income is \$25 (which is 25% of your trading amount), then 15% of that income i.e., \$3.75 – will be your share.

Example 2

Calculation Formula

$$\begin{aligned} \$100 \times 15\% &= \$15 \\ 15 \times 15\% &= \$2.25 \end{aligned}$$

If the trading package is \$100 and trading income is \$15 (which is 15% of your trading amount), then 15% of that income – i.e., \$2.25 will be your share.

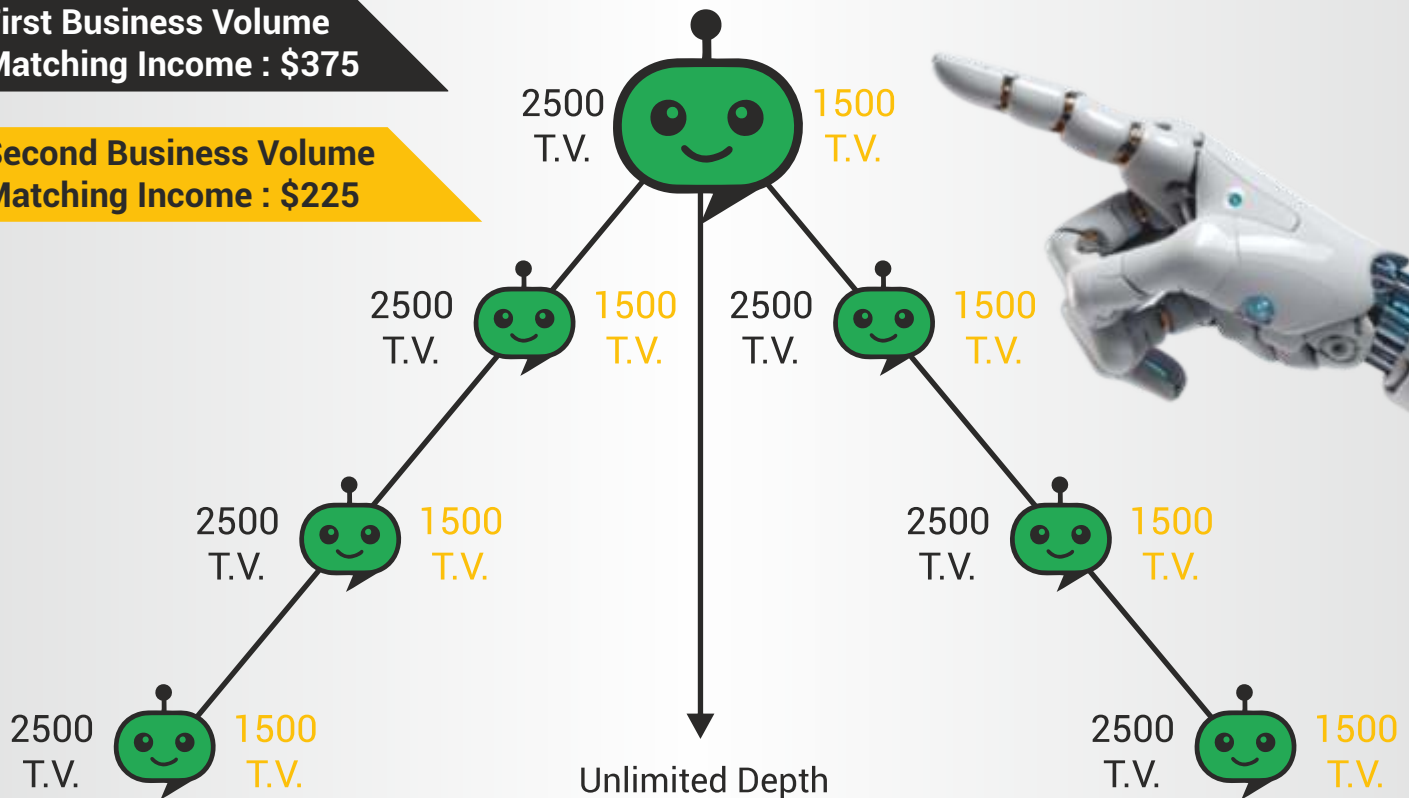

Development Income 5%

- ◎ 3 Direct sponsors are compulsory and you can have unlimited direct sponsor accounts, every direct sponsor account will spill over to extreme left or extreme right.
- ◎ Trading income volume matches at a 1:1 ratio with unlimited depth.
- ◎ After per day matching (Left : Right) remaining Trading Volume (T.V.) will be carry forward for next closing.

**First Business Volume
Matching Income : \$375**

**Second Business Volume
Matching Income : \$225**

Example Closing No. 1 :

As shown in Black Diagram :

7500 TV left : 7500 TV right

\$375 Development Income

Carry forward = Left TV 00 : Right TV 00

Example Closing No. 2 :

As shown in black diagram:

4500 TV left : 4500 TV right

\$225 Development Income

Carry forward = Left TV 00 : Right TV 00

PER DAY CAPPING

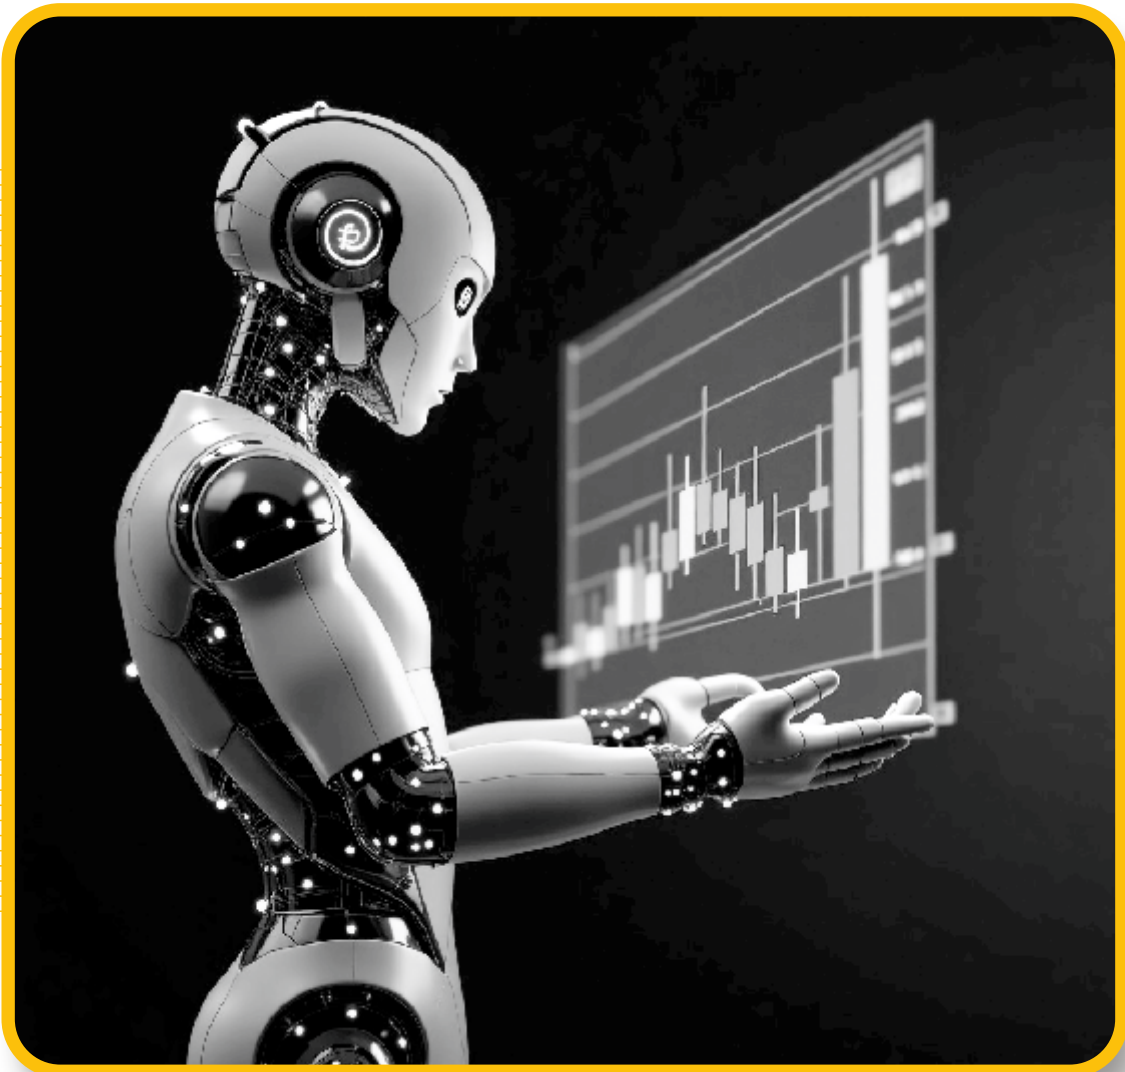

OF DEVELOPMENT INCOME

Package Amount	Capping Percentage	Capping Amount
\$500	100%	\$500
\$1000	80%	\$800
\$2500	60%	\$1500
\$5000	50%	\$2500
\$10000	40%	\$4000
